

Leaf Defier™

For years, folks have asked us if there were any products that would truly free them from the periodic chore of cleaning pine needles, leaves and debris out of their gutters. Until recently, our answer has been 'no'. All aluminum and plastic gutter covers suffer from some or all of the following problems:

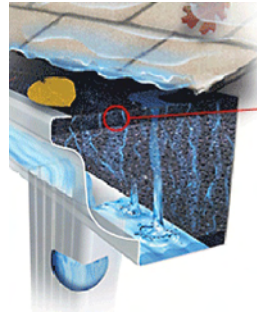

- They create lots of icicles in winter.
- They are easily ruined by hail.
- They reduce the gutters' water carrying capacity.
- They cause water to overshoot the gutter at valleys.
- They do not keep out small needles and debris.
- They create protected breeding areas for mosquitoes.
- They are quite visible, affecting your home's curb appeal.
- They may void your shingle warranty.
- They cannot be installed with all roofs.
- They are very expensive.

In 2005, the manufacturers of Leaf Defier™ introduced us to their revolutionary new system for keeping your gutters clean and running freely. Skeptical, we gave it a thorough test under a variety of conditions before accepting a dealership. Leaf Defier™ passed with flying colors!

- ✓ With Leaf Defier™ installed, your gutters are not more prone to icicle formation.
- ✓ Made of rugged polyurethane, Leaf Defier™ is very resistant to hail damage.
- ✓ Gutter capacity is not reduced.
- ✓ Even the smallest needles are prevented from clogging your gutters.
- ✓ Mosquitoes cannot get to water in your gutters.

- ✓ Leaf Defier™ is not visible from the street.
- ✓ Will not affect your shingle warranty.
- ✓ Can be used with any roof style.
- ✓ Up to 60% lower in price.
- ✓ 25 year no clog warranty.
- ✓ Extra Bonus - Have you ever been bothered by the noise of water splashing into your gutters? Leaf Defier will quiet them for you.
